

HORIZON-CL5-2022-D1-01-02-two-stage: Socio-economic risks of climate change in Europe

EXPERTISE OFFER — WP LEAD, TASK LEAD

Research team — CSS Centre for Climate Change and Social Ecology

The CSS Centre for Climate Change and Social Ecology conducts, coordinates and presents research on the social, political, legal and ecological impacts of climate change. It organises thematic lectures and conferences, participates in the development of teaching materials for higher education; and in the design and implementation of joint domestic and international research projects. The mission of the Centre is to increase resilience in the Hungarian society to the serious risks and consequences of climate change.

Expertise offer for the call

- Literature review, study design, desk research: analysis of grey literature
- Networks in local practice partners,
- Quantitative methods: collecting and analysing survey data (statistical analysis based on SPSS and STATA)
- Quantitative methods: conducting focus groups, semi-structured and narrative interviews and analysis of them using softwares (Nvivo, MaxQda), transect walking, participatory observations
- Participatory methods: community forums, living labs, Delphi methods
- Hungarian qualitative case studies, and conducting quantitative cross-country comparisons
